

AF-Colenco Ltd is a successful Swiss engineering company belonging to the world-wide operating AF Group. We are specialised in the fields of energy and environmental technology. Our Engineers are specialists and all-rounders ensuring the market success of our company as well as our dynamic development.

To strengthen our **Hydropower Plants** Department we are looking for the following permanent staff

▪ International Project Managers

for ongoing projects in Laos, Vietnam and India, with the possibility of Branch Office senior management positions in the future

▪ Freelance Project Specialists (long or short term)

Hydropower Engineers, Geotechnical Engineers, Engineering Geologists, Structural Engineers, Mechanical Engineers, Electrical Engineers, Contracts Engineers, Social and Environmental Specialists

We offer up-to-date workplaces and challenging assignments:

a friendly professional team environment committed to quality • a platform for genuine career development • challenging assignments on complex hydropower projects, mainly across Asia but also in developing markets in Africa and South America • a wide portfolio of projects at different stages of development

We expect well-founded expertise and a strong character profile:

university degree and at least 15 - 20 years of project experience in bankable feasibility studies, tender design, construction design and construction supervision • ability to prepare reports and technical papers • cultural sensitivity • willingness to travel • fluency in written and spoken English

We look forward to receiving your application - and the pleasure of meeting you personally:
